ABOUT LEAF NOW

.

Ever since industrialization started the care for plants has made it to their least priority list, Even though mankind requires plants to balance the food chain that he's a part of, but the plant enthusiasts are everywhere, be it big metropolitan cities or rural areas, so they aim to bring in a platform that can connect these plant/nature enthusiasts and help them exchange/sell them plants or donate seeds/plants as part of the green initiative that they started 2 years back.

Features of Leaf Now

The most important feature of LEAF NOW is connecting enthusiasts, which means that users should be able to create an account on the site and can start filling a form to submit their services, which will later be published by our team if it is genuine

The second feature is encouraging users to sell/buy/donate plants/seeds, by letting them know the importance of the same

The third important feature is the discussion page, set up a discussion page for the enthusiasts to start a discussion on topics that they like

A pdf for every donation, a donation can be money (1rs for every plant) requires you to convert web content to pdf encouraging other users to do the same
